Quintino
MATERIAL HANDLING SOLUTIONS

III What & Why @QuintinoMHS ?

We're a 25 years old argentinian Company, focused in Intralogistics Developements. We are focused in tailormade developements, where the key fact, is our customers business. Our References include a whole line of leader Brands, in different industries such as Food&Bev, Non-food, Pharma, apparel, Consumer Goods, Agro Industries, Parcel&Postal, Retail, Airports, and more.

We're proud of our long lasting relationship with our top-position customers, partners and suppliers. That's the way we do: Personalized attention, our priority.

- + ANALYTICS
- + D&D (Design & Developement)
- + CONSTRUCTION

- + INSTALATION ASSEMBLING
- + STARTUP
- + LIFE CYCLE PROJECT

III Key Technical Service

- Assistance + Technical Support: We bring different levels of specific technical service which ones fitting out to our customers needs, according to the Project step or state:

F.A.T. Facility Acceptance Test

Start up

Site Acceptance Test and Commissioning

Remote Support + Help Desk

Resident Maintenance

Resident Periodic

#INDUSTRY4.0
+
#LOGISTIC4.0
#INTRALOGISTIC4.0

- Control + Measuring + Analytics: Retrofeed for performing. Energy and efficiency data analytic, are the key fact to drive your maintenance from preventive to predictive. That's the industry 4.0 age.

- Modernization: The New E-Consumer habit's, have been changing the market place rules. Those new trends drive us to new rules for our customers and we have been performing our services and capabilities to empower and optimizing systems according these new ones. Keep upgrading our customers system's to keep it the innovation way through the forth industrial revolution. INDUSTRY4.0

In that new industrial age, machines and humans Work together sharing information and keep on performing them selves all the time. Pointing to high efficiency plants CDs, warehouses and Fulfillment Centers.

-Official Service & Spare Parts:

Emergency kits always available, and customer supports 24x7. Always-On.

Interroll Official Service for Argentina

PARTNERS

The Interroll Group is a leading global manufacturer of key products and high-quality service provision for internal logistics with HQ in Switzerland. We are the exclusive Partner in Argentina of its #RollingOnInterroll Program, thus ensuring the level of quality globally, with local service and assistance for our clients.

It reaches beyond the limits of traditional transport systems thanks to the revolutionary development of smart modular belts. A step ahead of industry standards. Exclusive licenses ARB (Activated roller Belt) and DARB (Dual Activated Roller Belt) in Argentina.

Cassoli is an Italian company with more than 75 years of presence in the market of Movement and Storage of Products and Loads. Today with a global presence, Cassoli with HQ in Italy has production plants in the US, Poland and Brazil. We have local exclusivity to provide our customers with the best automation options tailored to their needs: AS / RS Miniloads, AGVs, SLS, Radio Shuttles. Full range of open Information Systems for the management of warehouses and warehouses, are some of the customizable products and complements of the intralogistics solutions development.

With more than 40 years of history, Haloila is the leading company in the manufacture of automatic and semi-automatic wrappers with the highest quality. Narrow, stretch wrap machines for all types of loads. It is part of Signode Industrial Group, which is composed of more than 90 business units specialized in packaging machines and materials throughout the world.

Smart Pal Line of Palletizing Robots among other advanced technological solutions that lead us to the future of Production and Digital Processes. Comau products combine modern technological expertise and innovative engineering, ensuring long-term performance, accuracy and reliability. Comau generates intuitive solutions, easy to understand and operate, keeping automation simple, while quality is increased and processes are optimized.

III AS/RS Automatic Storage and Retrieval System

III Automated Sorting Systems

#FULFILLMENT #OMNICHANNEL # SORTING # CROSSDOCKING #PICKING
INTRALOGISTICS + INDUSTRY4.0

Sorters systems, this implies the automation of the product or load classification process. To optimize and decompile operations such as Crossdock, Storage, Palletizing / Depalletizing, Ordering, etc.

The system design is developed according to:

- Required operating speed, low, medium or high process capacity.
- Space available for development
- Volume and Weight of the Product
- Fragility of the load
- Number of inputs and outputs
- Operating temperature
- Feeding points

#STACKERTRANS #AGVs #RADIOSHUTTLE #SLS
#SHUTTLE LOOP SYSTEM #MINILOAD #UNITLOAD

- AS / RS Automatic Warehouses are quick ROI and the fastest and most efficient way to turn storage into profitable and a key competitive advantage for your business.
- Total optimization of occupancy level of the Warehouses in its 3 dimensions.
- Real-time accuracy of the load flow, in all the involved areas of the process.
- Modularity, flexibility, versatility and scalability according to different scope and driving through the objectives and resources of each client.
- Great Speed of Reception and Dispatch of Loads.
- Great storage capacity and flexibility of it.
- Systems with long-term equipment.

In all cases, the AS / RS developments are accompanied by IT management systems for each process, created and patented by Cassioli. Each system is oriented to follow the variables indicated by each client. All of them can be perfectly integrated with the IT systems that each client possesses, thus managing the process in its entirety.

Crossbelt Sorter

III Automatic Palletizing Solutions

Our plus as specialists in Material Handling, transport and intralogistics allows us to optimize the project from the beginning, avoiding modifications and subsequent adaptations, accelerating the start-up, and obtaining a system that is created according to the needs of the particular process of your product and not based on the characteristics or limitations of a standardized system.

#PickingLayers #PalletDispenser #PalletsRejecter
#Outfeeders #Convergence

The systems designed, developed and manufactured in our plant, count with long service life cycle, and meet the goal of proper treatment for keep both containers and packaging intact, in turn forming safe and stable loads.

Complements and components

III Picking Systems Solutions

With the formation of increasingly smaller and more flexible orders, the Picking systems today must be able to prepare orders for pallets, packages, boxes and even single units.

- Semiautomatic Picking
Pick to ligh
Put to ligh

- Cartesio: The specific Cassioli system for Store and Picking at high speed elements such as components, spare parts, etc.

High density + High speed operation / Recovery.

Handling of plastic buckets.

Accurate real-time inventory

Integration to the client software's.

Cartesian picking Robot for fast order fulfillment.

Multi-operative consultation levels.

Maximum safety and preservation of materials.

"Rolling On Interroll" is not only a quality label. It is our joint statement for superior quality and performance that we're making together with our partners.
